THE GUM REMOVAL SPECIALISTS

For a decade, Eco Removal Systems has specialised in the design and manufacture of powerful, self-contained chewing gum removal machines.

Our Ecogum range of machines are lightweight, durable and highly reliable; we manufacture our machines in the UK at our factory in Birmingham.

Our Ecogum backpack machines have the following benefits:

-  Long Runtime
-  Eco-Friendly
-  Minimal Disruption
-  User-Friendly
-  Ultra-Portable
-  Lightweight

ecogum **E-maxE**

The Fully Battery Gum Remover

The Ecogum E-MaxE has been designed and created by our team of expert engineers, after years of research and development with the goal of creating a fully battery-powered and lightweight machine that has a long runtime.

With our proven track record of creating a high performance and reliable machine, the Ecogum E-MaxE was a great addition to the Ecogum range as a completely electric, gum removal machine.

The Ecogum E-MaxE is carried in a lightweight backpack with a long runtime and interchangeable batteries.

The E-MaxE is perfectly safe to use indoors, at any time and around the general public. It is the perfect machine for minimal disruption and fast operation.

E-MAXE

Completely Electric

The Ecogum E-MaxE has been designed and created by our team of expert engineers, after years of research and development with the goal of creating a fully battery-powered and lightweight machine that has a long runtime.

Handheld Controller

The Ecogum Midi, Maxi and E-MaxE are equipped with a handheld controller that can be attached onto the machine's harness, allowing easy access to the controls.

Long Runtime

All Ecogum machines have up to 8 hours continuous runtime.

Completely Silent

The Ecogum machines are completely silent, allowing them to be operated at all times of the day or night.

Ultra-Portable

Our self-contained backpack machines are easily stored and transported; no power source or water supply required.

Eco-Friendly

Our machines use a natural, pH neutral detergent which is scientifically formulated to remove all types of chewing gum from any surface.

User-Friendly

Our Ecogum machines are very user-friendly and can be operated around the general public, creating very positive PR coverage and visibility.

Lightweight

Every Ecogum machine is very comfortable for the operator to wear over a long period of time.

Long Runtime

The lithium-ion batteries have been designed and manufactured by our team of engineers, to create a lightweight battery with a minimum of 80 mins continuous use, per battery.

Ultra-Fast Charging

The Ecogum E-MaxE is supplied with an ultra-fast charger which will fully charge a battery in approximately 100 minutes; making continuous operation easy.

Suitable for Indoors

The Ecogum E-MaxE is perfect for external use but can also be used internally in areas like shopping malls, retail units and educational settings.

Durable Case

The Ecogum Maxi and E-MaxE has a purpose-built, robust and durable backpack which also allows the operator easy access to load and unload consumables.

ecogum

ecogum® E-maxE

- ✔ Completely electric
- ✔ 2 x interchangeable lithium batteries
- ✔ 80-minute runtime (per battery)
- ✔ Ultra-fast charger
- ✔ Handheld controller for extra control
- ✔ Robust and durable outer casing
- ✔ Our lightest ever carbon fiber lance
- ✔ Battery monitor
- ✔ Runtime monitor
- ✔ Heat Indicator

Price per unit:
£3499

- ✔ 8-hour lithium battery runtime
- ✔ Gas-powered
- ✔ Handheld controller
- ✔ Robust and durable outer casing
- ✔ Lightweight carbon fiber lance
- ✔ Battery and runtime monitor
- ✔ Fluid sensor

Price per unit:
£3199

- ✔ 8-hour lithium battery runtime
- ✔ Gas-powered
- ✔ Handheld controller
- ✔ Softshell outer casing
- ✔ Lightweight carbon fiber lance
- ✔ Battery monitor
- ✔ Fluid sensor

Price per unit:
£2699

- ✔ 4-hour lithium battery runtime
- ✔ Gas-powered
- ✔ Softshell outer casing
- ✔ Controls on the base of the machine
- ✔ Lightweight carbon fiber lance

Price per unit:
£2399

Electric Service Pack
